

## Zero bacteria and get rid bad smells in your restroom on a Green way

### The Ultimate in Restrooms.

Veltia CleanAir purifiers utilize a science that treats the air by patrolling against unpleasant odours, bacteria and even allergens as they float around us. Endorsed by the British Allergy Foundation, the unique yet discreet device is virtually unnoticeable, but its effect is extraordinary. The result is fresher, cleaner air that enhances people experience, for the world's freshest restrooms.

There is an all-in-1 indoor air freshness solution that works 24 hours a day, 7 days a week; a solution that makes a huge difference in air quality, but that is so small and silent you barely know it is there.

It's called **Veltia Cleanair**.

### What is Veltia Cleanair?

Is an air purifier with multiple applications. Using the technology of electrostatics it provides a long-term solution for odour removal and air freshening, improving indoor air quality and helping people breathe more easily. It works by gently releasing microscopic particles called Liquid-ions. They float around on the air currents, attracting airborne particulates and removing them from the air. It actually improves indoor air quality, the air feel fresh and clean.

### Veltia CleanAir Benefits

Are safe, trusted by users and endorsed by the British Allergy Foundation.

Are completely silent.

Inexpensive to use.

Do not release ozone.
